HSU Enterprise Application Stack(HSU EAS)

MANUAL

Marvin
HSU FORUM
VERSION 2.0.0

目錄

1. Introduction

HSU Enterprise Application Stack(HSU EAS)，It is made by Marvin. You can download from Git Hub. EAS was made by using main stream Java technology, include Prime Faces(JSF), Spring Boot, Hibernate(JPA) and Spring Security. The goal of EAS is increase productivity, compare with using Java script to develop, it can increase 20%~30% productivity. HSU Common is common library, HSU EAS is main application. I suggest work with Dock, Kubernates, Openshift OKD. Default account and password is admin and abcd1234

- Support language is Traditional Chinese, Simple Chinese and English
- Support DB is Oracle, SQL Server and MySQL
- Support AP Server is Tomcat, Jetty, JBoss WildFly, Jboss EAP and WebLogic。
- HSU Common Git Hub download address is https://github.com/MarvinHsu/HSUCommon
- HSU EAS Git Hub download address is https://github.com/MarvinHsu/EAS
- Support Java AP Server

Java AP Server
Tomcat
Jetty

- Support Data Base

Data Base	Version
MySQL	5.5+
Oracle	10g+
SQL Server	2008+
DB2	9.7+
PostgreSQL	9.6+

2. Using steps

1. Import Git Maven Prject in Eclipse
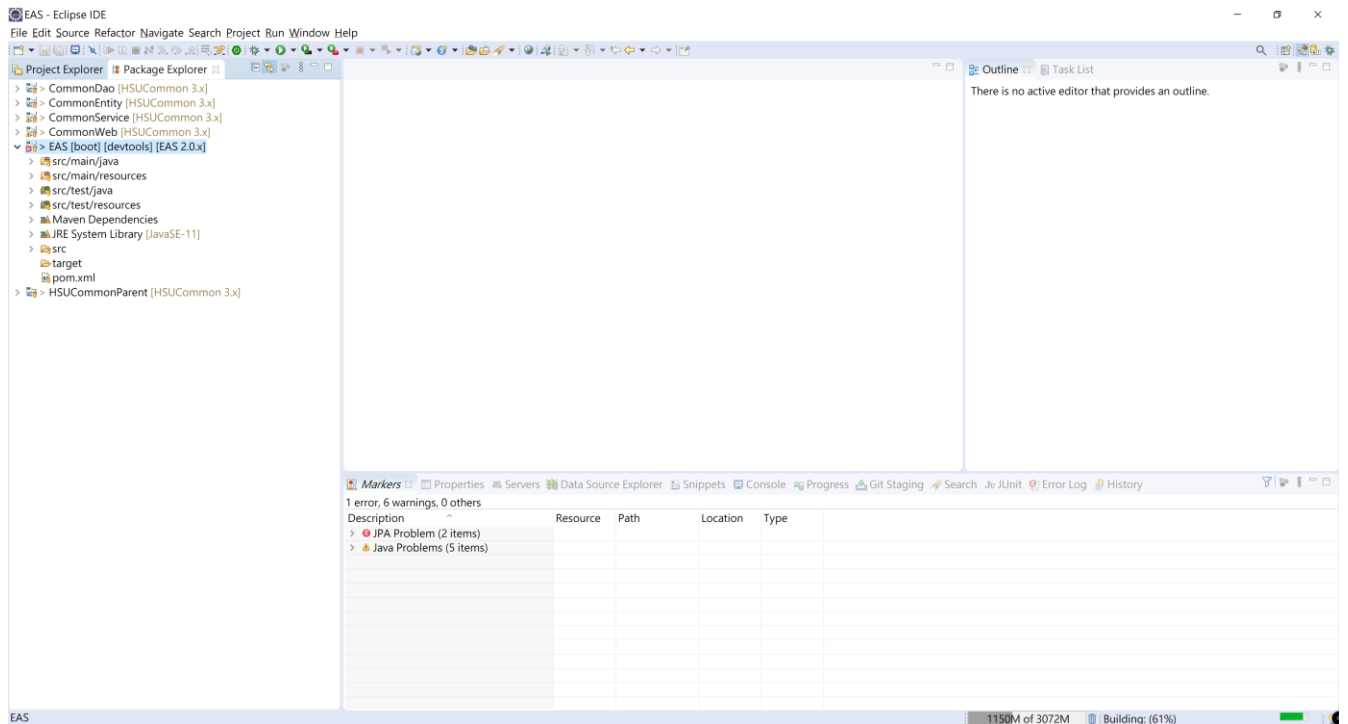

2. Depend your DB environment to execute DB Schema SQL and DB Init Data SQL

- 📂 DB Init Data SQL
  - 📄 Init Data en.sql
  - 📄 Init Data en_PostgreSQL.sql
  - 📄 Init Data zh_CN.sql
  - 📄 Init Data zh_CN_PostgreSQL.sql
  - 📄 Init Data zh_TW.sql
  - 📄 Init Data zh_TW_PostgreSQL.sql
- 📂 DB Schema SQL
  - 📄 DB2 Schema.sql
  - 📄 MySQL Schema.sql
  - 📄 Oracle Schema.sql
  - 📄 PostgreSQL Schema.sql
  - 📄 SQL Server Schema.sql

3. Start AP Server and brows default page. Default account and password is admin and abcd1234

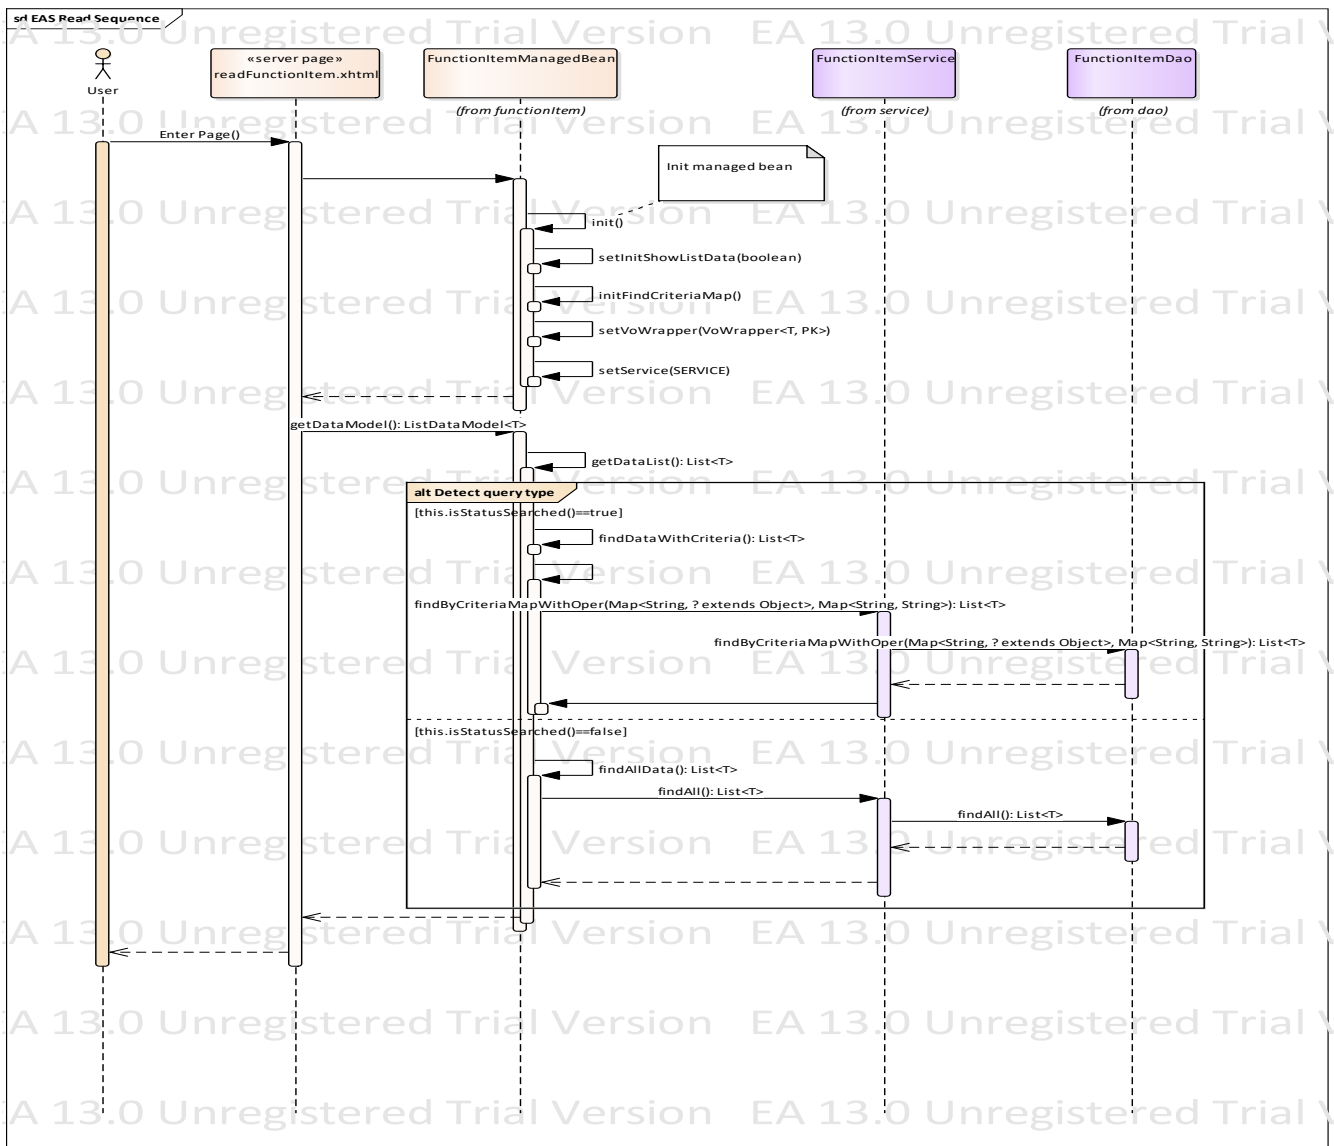

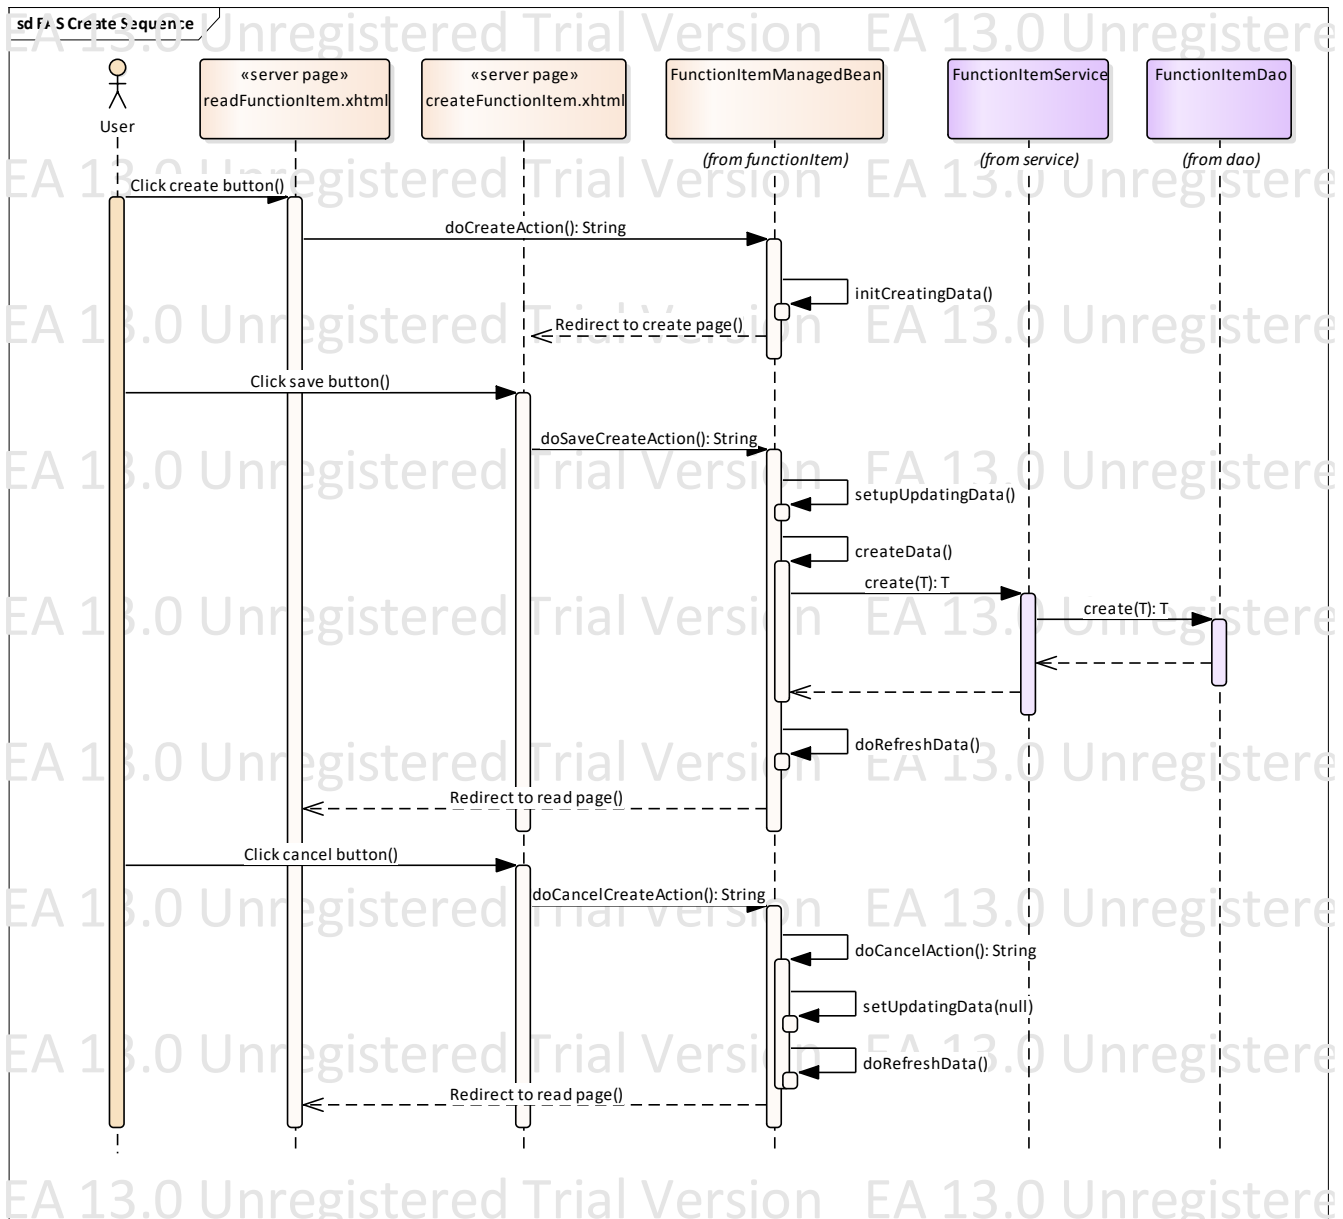

4. After login you can use the manage function

3. CRUD sequence machanism

3.1 Query

3.2 Create

3.3 Update & Delete
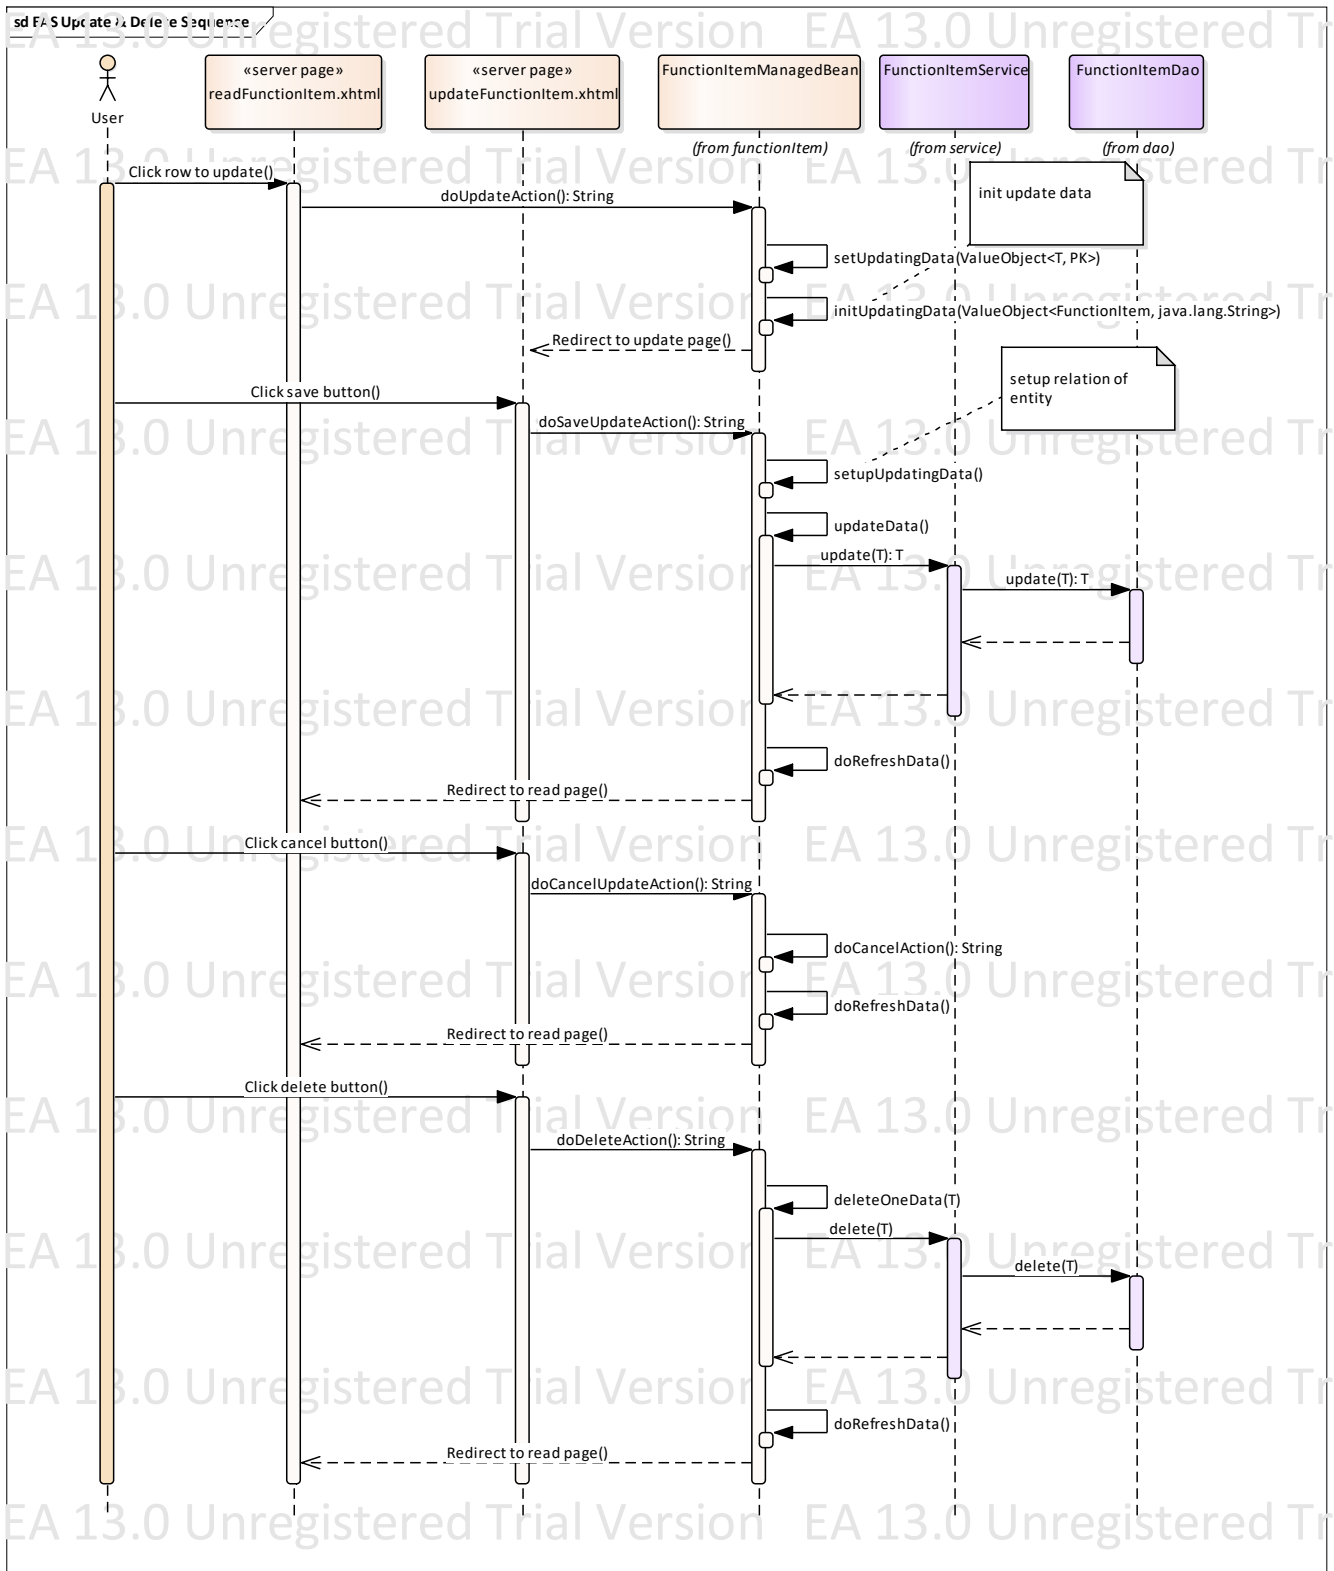

4. Function

4.1 Function item

- Click delete button can delete the module data.
- Input data and click save button can modify the module date.
- Click cancel button will go to query page.

5. Others

5.1 default-faces-config.xml

There are some options of whole system in default-faces-config.xml.
- systemCode default value is EAS, this is identifier of system.
- devMode default value is true, this can control ID column show or not show in query page.
- rowsOfPerPage default value is 25, this can control how many rows show in one page.
- timeZone default value is Asia/Taipei, this can control system show time zone.
